

# Company Information Check

The **Company Information Check API** allows merchants and partners to retrieve the verification history and details of a specific company. By querying a company's ID, you can access data such as past verification attempts, credit scores, risk levels, and contact information verified via BankID. This enables better decision-making for credit risk assessment, compliance, and onboarding.

## Use Cases

- **Audit Trails:** Review past verification events and maintain a log for compliance.
- **Credit Assessment:** Understand previous credit ratings and risk levels before extending services.
- **Compliance Reporting:** Meet KYC and AML requirements with verifiable data records.
- **Troubleshooting:** Investigate previously initiated checks for support and debugging.

## Endpoint

```
GET https://demo-api.frontpayment.no/api/v1/connect/company/details/{company_id}
```

Replace `{company_id}` with the numeric identifier of the company.

## Authentication

Include a **Bearer Token** in the `Authorization` header. You can obtain this token from **Front Payment**.

### Example:

```
Authorization: Bearer YOUR_FRONTPAYMENT_BEARER_TOKEN
```

## Response

A successful response returns **200 OK** with the company's verification history.

# Example Response

```
{
  "status_code": 200,
  "status_message": "OK",
  "message": "companyRecordRetriveSuccessfully",
  "is_data": true,
  "data": [
    {
      "companyCheckUuid": "COMCHK1754819969",
      "companyId": "920058272",
      "companyType": "BRL",
      "companyName": "FLØTNINGEN PARK II BORETTSLAG",
      "score": "856",
      "riskLevel": "Low",
      "scoreMessage": "Good Credit Rating",
      "defaultProbability": "0.44",
      "personalNumber": "28038712383",
      "contactPersonName": "Georg Bøe",
      "contactPersonEmail": "[email protected]",
      "createdAt": 1754819969
    }
  ]
}
```

## Field Descriptions

Parameter	Type	Description
companyCheckUuid	string	The UUID you received when initiating the call.
companyId	string	The verified company's ID.
companyType	string	The type/category of the company.
companyName	string	The legal name of the company.
score	number	The company's credit score.
riskLevel	string	The risk level based on the credit score.

Parameter	Type	Description
scoreMessage	string	Message providing context about the credit score.
defaultProbability	number	Probability of default based on credit assessment.
personalNumber	number	Personal number retrieved from BankID.
contactPersonName	string	Full name of the contact person from BankID.
contactPersonEmail	string	Email address of the contact person from BankID.
createdAt	number	Unix timestamp of when the company check was created.

## Notes

- The response array may contain multiple records if the company has undergone multiple checks.
- Ensure secure handling of all personal and company data to maintain compliance with privacy laws.
- For questions or demo access, contact [nafees.faraz@frontpayment.no](mailto:nafees.faraz@frontpayment.no).
