

Get Credit Check By UUID

This API enables your application to **retrieve detailed information for a credit check history** using its unique UUID. It provides a complete snapshot of a credit check request including its score, score message, risk level, organizationId/personalNumber.

Use Cases

- **Credit Check History:** Your application can display a detailed credit check history to users, including information of the person for whom credit check was requested and credit check details data.

Endpoint

```
GET https://demo-api.frontpayment.no/api/v1/connect/credit/check/details/{{creditCheckUuid}}
```

Authorization

Include a **Bearer Token** in the `Authorization` header. You can obtain this token from **Front Payment**.

Example:

```
Authorization: Bearer YOUR_FRONTPAYMENT_BEARER_TOKEN
```

Response

A successful request will return a `200 OK` status with the following JSON payload:

```
{
  "status_code": 200,
  "status_message": "OK",
  "message": "creditCheckHistoryRetrievedSuccessfully",
  "is_data": true,
  "data": {
    "uuid": "String",
```

```
"date": "String",
"name": "String",
"type": "String",
"companyType": "String",
"organizationId": "String",
"personalNumber": "String",
"countryCode": "String",
"msisdn": "String",
"defaultProbability": "String",
"score": "Integer",
"scoreMessage": "String",
"riskLevel": "String",
}
}
```

API returns a **404** error, it means requested order with **ORDER_UUID** could not be found in our system.

```
{
  "status_code": 404,
  "status_message": "Not Found",
  "message": "creditCheckHistoryNotFound",
  "is_data": false,
  "data": null
}
```

API returns a **510** error, it means something failed on the server side

```
{
  "status_code": 510,
  "status_message": "Execution Exception Occurred",
  "message": "Something Went Wrong",
  "is_error": true,
  "errors": "Array"
}
```
